29 November 2022 Agenda

Attendees

Markas Aišparas - Notetaker
Gayeon Jee - Leader
Maria Mihai
Jakub Patałuch
Zofia Rogacka-Trojak
Andrei Simionescu

Last Week

- Worked on requirement engineering rough draft
- Worked on bounded context rough draft

Points to overview

- Feedback on requirement engineering document
  - Questions regarding the scenario:
    - What types of relations for certificates should we accommodate for?
    - Certificate must be assignable to the given boat type?
    - Users should be able to acquire a given certificate (to decide whether to add by user and then verify by admin, or only by admin, etc.)?
    - Should users view training sessions for skill levels different from their own?
    - How to cope with organizations? (Roles within organizations?)
- Feedback on the bounded context assignment and clarification on the assignment
  - How many of the bounded context steps are we supposed to do?
- Lab template - are we just supposed to merge it into Gitlab?
